PROJECT DESIGN PHASE-II
SOLUTION REQUIREMENTS (FUNCTIONAL & NON-FUNCTIONAL)

Team ID: SWTID-2026-1398	**Date:** 30 September 2026
Project Title: Import Data Using Transform Maps	**Maximum Marks:** 4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Spreadsheet Upload & Staging	• File Parsing & Processing (Excel/CSV) • Import Set Staging Table Allocation • Raw Data Storage & Field Formatting
FR-2	Transform Mapping & Field Configuration	• Field Mapping (Employee ID, Name, Email, Dept, Location) • Target Table Binding (Employee Master / sys_user) • Data Type & Format Validation
FR-3	Record Coalescing & Deduplication	• Unique Identifier Matching using Employee ID • Update Record logic for existing Employee IDs • Insert Record logic for new Employee IDs
FR-4	Import Verification & Error Logging	• Transform Execution Log Generation • Invalid Row Exception Handling • Verification of Updated Profiles

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	Intuitive administrator UI in ServiceNow for uploading spreadsheets and viewing real-time transform status.
NFR-2	Security	Role-based Access Control (RBAC) ensuring only authorized administrators can trigger import sets or view PII employee data.
NFR-3	Reliability	Atomic transactions during transformation ensuring data integrity and zero corruption if a batch upload is interrupted.
NFR-4	Performance	High-throughput batch processing capable of executing transform maps for thousands of records within acceptable response times.
NFR-5	Availability	High system availability (99.9%) on the ServiceNow platform with 24/7 access for scheduled or manual imports.
NFR-6	Scalability	Seamless capacity to scale and process larger bulk employee spreadsheets or additional custom field mappings in future releases.
