IDEATION PHASE: DEFINE PROBLEM STATEMENTS

Customer Problem Statement Template

Date: 30 September 2026

Team ID: SWTID-2026-1398

Project Name: Import Data Using Transform Maps

Maximum Marks: 2 Marks

Problem Statement Table

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a ServiceNow System Administrator responsible for employee data synchronization	import bulk employee data (Employee ID, Name, Email, Department, Location) from external spreadsheets into ServiceNow efficiently	manual data entry and standard imports are slow, error-prone, and risk creating duplicate employee profiles	the system lacks automated staging validation and intelligent record matching to handle updates vs. new hires seamlessly	Frustrated, overwhelmed by manual cleanups, and concerned about organizational data integrity.
PS-2	an HR Operations Manager overseeing workforce data and onboarding operations	maintain accurate, up-to-date employee records across ServiceNow so teams have real-time access to correct department and location info	employee updates in target records are often delayed, inaccurate, or fail during bulk batch processing	there is no streamlined automated mapping mechanism that uses a unique identifier (Employee ID) to perform upsert actions reliably	Anxious about data discrepancies, delayed onboarding workflows, and operational inefficiency.
