IDEATION PHASE: EMPATHIZE & DISCOVER

Empathy Map Canvas

Date: 30 September 2026 **Team ID:** SWTID-2026-1398

Project Name: Import Data Using Transform Maps **Maximum Marks:** 4 Marks

Empathy Map Canvas - User Persona: ServiceNow System Admin / HR Ops

THINK & FEEL

What really counts? Preoccupations, worries & aspirations

- "Will bulk updates corrupt existing user profile attributes?"
- "I need an automated process so I don't have to clean data manually every week."
- "We must ensure Employee ID correctly drives update vs. insert actions."
- "Worried that missing Department or Location records will cause transform errors."

SEE

Environment, market, and operational reality

- Large spreadsheets from HR with hundreds of rows (ID, Name, Email, Dept, Location).
- Duplicate employee entries accumulating in the system due to past manual uploads.
- Transform Map error logs showing failed mappings and unresolved reference values.
- HR managers requesting immediate updates for newly onboarded staff.

HEAR

What colleagues, leadership, and users say

- HR Team: "Why hasn't the new employee's email or location updated in ServiceNow yet?"
- Management: "Data accuracy is essential for directory search and IT asset provisioning."
- System Audits: "We need a consistent Coalesce strategy to avoid duplicate user accounts."
- IT Support: "Ticket resolution is delayed because user departments are incorrect."

SAY & DO

Public attitude, behavior, and workflow habits

- Uploads raw spreadsheets into staging tables to run initial validation checks.
- Configures Coalesce settings on Employee ID to automate update-or-insert logic.
- Tells HR: "Send structured files so we can map Department and Location reliably."
- Monitors Import Set Run logs post-transform to handle any skipped rows manually.

PAIN

Fears, Frustrations & Obstacles

- Time-consuming manual data cleanup and row-by-row auditing.
- Risk of overwriting accurate user profile data with malformed spreadsheet rows.
- Duplicate records created when primary keys (Employee ID) are missing or misconfigured.
- Unclear handling of missing Department or Location reference values during transformation.

GAIN

Wants, Needs & Measures of Success

- Automated, error-free import process utilizing Import Sets & Transform Maps.
- Seamless update-or-insert (upsert) execution using Employee ID as the unique identifier.
- Clean data consistency across target Employee, Department, and Location tables.
- Significant reduction in manual admin workload and improved onboarding efficiency.
